

TBP Global Strategist

Version 2 — Platform Updates

Board Briefing — July 2026

<https://www.tbpglobalstrategist.com>

What Changed in Version 2?

Version 2 adds **three major capabilities** that were missing in Version 1: a complete onboarding and payment system, a referral and commission program, and a full admin management suite. These updates turn the platform from a prototype into a **production-ready system** that can onboard strategists, process payments, track referrals, and manage the entire community.

New UI
Components

1. Onboarding & Payment System

What it does: Strategists can now register, complete a 7-step onboarding process, select a fellowship plan, and pay online — all within the platform.

Before Version 2

- Users could register with email and password only
- No fellowship plan selection
- No online payment processing
- No legal agreement signing
- Admin had to manually set up each new user

After Version 2

- **7-step guided onboarding** — Collects personal details, fellowship selection, legal agreements, and payment
- **Two fellowship plans** — Standard (\$1,200) and Plus (\$1,500)
- **PayPal payment processing** — Secure payments via PayPal
- **Legal agreements** — 7 required terms with checkbox acceptance
- **Automatic account activation** — Users become active immediately after payment

How the Onboarding Works

Step 1: Create account and enter personal details (name, phone, location, LinkedIn, areas of interest)

Step 2: Review and confirm your information

Step 3: Choose your fellowship plan (Standard or Plus)

Step 4: Review the fellowship agreement

Step 5: Accept 7 required terms and conditions

Step 6: Pay securely via PayPal

Step 7: Receive confirmation and next steps

2. Referral & Commission Program

What it does: Strategists earn \$50 for every new member they refer who completes payment. The system tracks referrals, manages a wallet, and handles payouts.

How It Works

- 1. **Get Your Code** — Each strategist receives a unique referral code (e.g., TBP-JOHN-2026)
- 2. **Share It** — Send your code to colleagues and contacts
- 3. **Someone Registers** — When they sign up using your code, they are linked to you
- 4. **They Pay** — Once they complete their fellowship payment, you earn a \$50 credit
- 5. **30-Day Hold** — Credits are held for 30 days to ensure payment validity
- 6. **Auto-Approval** — After 30 days, the credit is automatically added to your wallet
- 7. **Get Paid** — Request a payout when your balance reaches \$100 or more

What Strategists See

Feature	Description
Referral Dashboard	View your code, referral link, total referrals, and earnings
Referral Wallet	See your available balance and total paid out

Payout Requests	Request payment via bank transfer or PayPal
Payment Methods	Store your PayPal email or bank account details
Status Tracking	See where each referral is in the process

What Admins Can Do

- View all referrals and their statuses
- Approve or reject payout requests
- Process payments and mark as paid
- Generate referral codes for users
- View the full audit trail of all actions

3. Admin Management Suite

What it does: A complete set of tools for administrators to manage users, projects, referrals, payments, and the overall platform.

User Management

- **Add users** — Create accounts for new strategists
- **Change roles** — Promote or change user roles (Admin, Strategist, Corporate, etc.)
- **Change stages** — Move users through the 6-stage progression pathway
- **Reset passwords** — Help users who are locked out
- **Assign work areas** — Match strategists to their areas of expertise
- **Deactivate users** — Remove access when needed

Platform Analytics

- **User growth charts** — See how the community is growing
- **Project statistics** — Track active projects and progress
- **Budget analysis** — Monitor project budgets and spending
- **System health** — View uptime, memory usage, and database counts

Referral & Payment Management

- **Referral dashboard** — View all referrals and their statuses
- **Payout processing** — Approve, process, or reject payout requests
- **Audit trail** — Complete history of all referral and payment actions
- **Code generation** — Generate referral codes for users in bulk

4. New Dashboard Features

What it does: Strategists and admins now have dedicated dashboards with real-time information and tools.

For Strategists

Feature	Description
Personal Dashboard	Stats, projects, activity feed, and progression pathway
Browse Projects	Search and join TBP projects
Referral Dashboard	Your referral code, earnings, and payout requests
Payment Methods	Manage your PayPal or bank account details
Notifications	Stay updated on stage changes, assignments, and messages
Profile Management	Edit your professional profile and featured project

For Admins

Feature	Description
Admin Overview	Platform stats, recent users, recent projects, verification queue
User Management	Add, edit, change roles/stages, reset passwords, assign areas

Analytics	Charts showing user growth, project trends, and budget analysis
Referral Management	Approve credits, process payouts, view audit logs
System Health	Uptime, memory usage, node version, database statistics
Notifications	Send announcements to users

5. Summary of Changes

Area	Version 1	Version 2
Onboarding	Basic registration only	7-step guided flow with payment
Payments	None	PayPal integration
Fellowship Plans	None	Standard (\$1,200) + Plus (\$1,500)
Referrals	None	Full referral system with \$50 commission
Wallet & Payouts	None	Wallet balance + payout requests
Payment Methods	None	PayPal + Bank Transfer
Admin Tools	Basic user management	Full user, referral, payment, and system management
Analytics	None	Charts, trends, and system health
API Endpoints	36	44 (+8 new)
Database Models	20	31 (+11 new)
Components	~40	~65 (+25 new)

6. Why This Matters

For the Organization

- **Revenue generation** — Fellowship payments can now be collected online automatically
- **Growth engine** — Referral program incentivizes members to bring in new strategists
- **Professional image** — Polished onboarding experience reflects TBP's global standards
- **Operational efficiency** — Admin tools reduce manual work for user management
- **Data & insights** — Analytics provide visibility into platform growth and engagement

For Strategists

- **Smooth onboarding** — Guided 7-step process makes joining easy
- **Flexible payment** — Pay with PayPal
- **Earn commissions** — \$50 for every successful referral
- **Transparent tracking** — See your referral status and wallet balance anytime
- **Easy payouts** — Request payment via bank transfer or PayPal

For Admins

- **Complete control** — Manage users, roles, stages, and work areas from one place

- **Referral oversight** — Approve credits, process payouts, view audit trails
- **Platform health** — Monitor system performance and database statistics
- **Growth visibility** — Charts and analytics show how the platform is performing
